**MAGSTIM  
TMS INTRO.**

---

With a rich history spanning four decades, Magstim has been at the forefront of innovation in neuromodulation technology.

Magstim is committed to developing advanced neurotechnology to study and treat the brain. Our technology provides neuroscience researchers and clinicians with tools to make impactful change in global healthcare.

Backed by a global team of experts with extensive knowledge and experience in neuroscience and neurostimulation, Magstim is dedicated to providing exceptional customer support and service, ensuring customers have the resources they need to accelerate research and care for future generations.

Magstim has been referenced in more than 15,000 clinical papers, highlighting its impact in the scientific community.

**MAGSTIM  
VISION.**

---

## Vision

Our vision at Magstim is to make the world a healthier and happier place through neurotechnology. Our goal is to empower researchers and clinicians to transform the way neurological and psychiatric disorders are understood and treated, ultimately improving the lives of patients worldwide.

Through ongoing research, development, and collaboration with leading experts in the field, we strive to push the boundaries of what is possible, pioneering new approaches to brain stimulation and analysis.

Together, we envision a future where our technology continues to break new ground, leading to discoveries and advancements that make a positive change for the world.

*"As CEO of Magstim, I am proud to lead a company whose pioneering EEG, TMS, and multi-modal technologies are revolutionizing neuroscience research and transforming the landscape of clinical diagnostics and treatment. Our ardent commitment to innovation and excellence drives us forward as we continue to empower researchers and clinicians worldwide to improve patient lives."*

- Ronnie Stolec-Campo - CEO

## Why Partner with Magstim

Our pioneering technologies and commitment to innovation make us the go-to choice for clinicians, researchers, and institutions.

Magstim products are designed with the latest advancements in neuroscience research, ensuring that users have access to the most advanced tools available for brain stimulation and analysis.

Magstim has a team of experts with unparalleled expertise and experience in the field of neuromodulation. Our dedicated support team is committed to providing exceptional customer service, offering guidance, training, and technical support to help users maximize the potential of our technologies.

# TMS STIMULATORS.

---

Magstim is a renowned leader in the field of Transcranial Magnetic Stimulation (TMS) technology, offering a range of TMS solutions that are revolutionizing neuroscience research, clinical and turn-key applications.

Magstim's TMS stimulators are designed with precision and innovation and have been featured in over 15,000 clinical studies.

**There are a range of stimulators available to suit your needs with systems capable of:**

- TMS (Single pulse)
- TMS (Paired pulse)
- rTMS (Repetitive)
- Theta (Burst) capability
- Monophasic pulse
- Biphasic pulse

**Stimulator Features Include:**

- Integrated navigation
- EMC (MEP) measurement device
- Patient data management
- Sham/placebo capabilities

**TMS  
RESEARCH.**

# MAGSTIM M200<sup>2</sup>

Part No. 3231-00

The Magstim 200<sup>2</sup> is a reliable, simple to use stimulator capable of stimulating the central and peripheral nervous systems with a single monophasic pulse.

The Magstim 200<sup>2</sup> is designed to be compatible with a wide range of Magstim coils (see compatibility table) and is easily integrated with external triggering and recording devices using a Magstim Interface Module (see the Accessories & Consumables section).

The Magstim 200<sup>2</sup> stimulator is supplied with a 3192-00 Single 90mm remote control coil and pneumatic footswitch for triggering.

Ideal for neurodiagnostic, prognostic and cortical mapping.

**Mains voltage variants:**

115/230V (configurable) or 100V (Japan)

Product Name	Part No.	Pulse Type	Output Type	Maximum Frequency (Hz/ pps)	Maximum Discharge Energy <sup>f</sup> (J)
Magstim M200 <sup>2</sup>	3231-00	Monophasic	Single	0.5	720
MEP (EMG)	Navigation	Horizon Adaptor Compatible	Patient Data Management	External Triggering	
Third party connectivity <sup>c</sup>	-	-	-		✓ <sup>c</sup>

<sup>c</sup> Requires the use of 3901-00 Interface Module.

<sup>f</sup> Maximum Discharge Energy is dependent on the system configuration and connected coil.

## Magstim BiStim<sup>2</sup>

Part No. 3234-00

The Magstim BiStim<sup>2</sup> combines two 200<sup>2</sup> units through a connecting module, so that paired pulses can be delivered through a single coil.

Setting the stimulator outputs independently allows the user to deliver precise sub and supra-threshold conditioning.

The BiStim<sup>2</sup> is designed to be compatible with a wide range of Magstim coils (see compatibility table) and enables two coils to be connected for dual-site stimulation. Single and dual coil set-ups can be easily integrated with external triggering and recording devices using a Magstim Interface Module (see the Accessories & Consumables section).

Ideal for neural inhibition/facilitation investigations, and modulation of cortico-cortical connectivity.

Suitable for stimulating both the central and peripheral nervous systems.

### Mains voltage variants:

115/230V (configurable) or 100V (Japan)

### Already have a 3231-00 M200<sup>2</sup> Stimulator and want to upgrade to BiStim<sup>2</sup>?

Do so with a 3236-00 upgrade package (voltage variants apply).

Product Name	Part No.	Pulse Type	Output Type	Maximum Frequency (Hz/ pps)	Configurable inter-pulse timing	Maximum discharge Energy <sup>f</sup> (J)
Magstim BiStim <sup>2</sup>	3234-00	Monophasic	Single, Paired Pulse	0.25	0-999ms	1163 <sup>P</sup>
MEP (EMG)	Navigation	Horizon Adaptor Compatible	Patient Data Management	External Triggering		
Third party connectivity <sup>c</sup>	-	-	-	-	✓ <sup>c</sup>	

<sup>c</sup> Requires the use of 3901-00 Interface Module.

<sup>f</sup> Maximum Discharge Energy is dependent on the system configuration and connected coil.

<sup>P</sup> For 0ms Inter-pulse spacing.

# RAPID<sup>2</sup> STIMULATORS

Magstim Rapid<sup>2</sup> stimulators have been used in numerous fundamental and clinical research studies worldwide, offering performance capabilities to meet a variety of research requirements, and compatible with a wide range of Magstim coils.

Capable of high-frequency and theta burst stimulation protocols for both cortical and peripheral research applications. Integrated display of motor evoked potentials (MEPs), with charge delay function for reduced artifacts during MEP or EEG recording. A Magstim Interface Module permits simple integration with external triggering and recording devices. The Rapid<sup>2</sup> Series stimulator comes in three variants of power capability to meet the needs of every application.

Ideal for a wide range of fundamental and clinical research applications applying neural modulation.

Suitable for both cortical and peripheral stimulation.

Voltage	Product Name	Part No.	Pulse Type	Output Type	Max Frequency (Hz/ pps)	Max Frequency at 100% Power (Hz/ pps)	System Power (kVA)	Pulse width <sup>g,h</sup> (µs)	Maximum Discharge Energy <sup>f</sup> (J)

	Super Rapid <sup>2</sup>	3005-00			100	25	6		
	Super Rapid <sup>2</sup> Plus <sup>1</sup>	4100-00			100	41	9		
115V	Rapid <sup>2</sup>	3004-US			36	11	2.3		
	Super Rapid <sup>2</sup>	3005-US			60	22	4.6		
	Super Rapid <sup>2</sup> Plus <sup>1</sup>	4100-US			60	27	6.9		

## Rapid<sup>2</sup>

Part No. 3004-00

This Rapid<sup>2</sup> System features a single HV Power Supply Unit (PSU) (3KVA).

MEP (EMG)	Navigation	Horizon Adaptor Compatible	Patient Data Management	External Triggering
✓ 2 channels	-	-	-	✓ <sup>c</sup>

## Super Rapid<sup>2</sup>

Part No. 3005-00

The Next level Rapid<sup>2</sup>, with increased frequency capability and Power x frequency relationship. This Rapid<sup>2</sup> System features a Dual HV Power Supply Unit (PSU) (6KVA).

**Already have a 3004-00 Rapid<sup>2</sup> Stimulator and want to upgrade to a Super Rapid<sup>2</sup> for enhanced Power x frequency capabilities?**

Do so with a 3014-00 and mains lead filter (voltage variants apply).

MEP (EMG)	Navigation	Horizon Adaptor Compatible	Patient Data Management	External Triggering
✓ 2 channels	-	-	-	✓ <sup>c</sup>

## Super Rapid<sup>2</sup> Plus<sup>1</sup>

Part No. 4100-00

As Rapid<sup>2</sup>, with increased Power x frequency relationship over the Super Rapid<sup>2</sup>.

This Rapid<sup>2</sup> System features the Dual HV Power Supply Unit (PSU) from the Super Rapid<sup>2</sup> stimulator paired with the Plus<sup>1</sup> combining module to take the stimulators capabilities to the next level (9KVA).

**Already have a 3005-00 Super Rapid<sup>2</sup> Stimulator and want to upgrade to a Super Rapid<sup>2</sup> Plus<sup>1</sup> for enhanced Power x frequency capabilities?**

Do so with the 4101-00 upgrade package (voltage variants apply).

MEP (EMG)	Navigation	Horizon Adaptor Compatible	Patient Data Management	External Triggering
✓ 2 channels	-	-	-	✓ <sup>c</sup>

<sup>c</sup> Requires the use of 3901-00 Interface Module.

<sup>f</sup> Maximum Discharge Energy is dependent on the system configuration and connected coil.

<sup>g</sup> Pulse width is dependent on the connected coil.

<sup>h</sup> Typical rise time values for monophasic pulses, and pulse widths for biphasic pulses.

# HORIZON SERIES TMS SYSTEMS

Elevate patient care and advance your practice with the Magstim Horizon range. The Horizon range has been designed with intuitive, user-friendly interfaces and treatment protocols, which provide clinicians and researchers with the flexibility to tailor stimulation parameters to individual patient needs, ensuring optimal treatment outcomes.

With options for:

- Intuitive preset clinical workflows
- Customizable treatments
- Treatment accuracy
- Advanced integrated neuronavigation
- Powerful data analytics
- Correct and consistent dosage amounts with no pulse decay
- Magstim's air-cooled coil technology eliminates downtime and extra expenses
- Consistent connected care across sites

# Horizon 3.0 with StimGuide Pro

Part No. 5505-00-50

Product Name	Part No.	Pulse Type	Output Type	Maximum Frequency (Hz/ pps)	Max burst Frequency at Max Power (Hz)
Horizon 3.0 with StimGuide Pro	5505-00-50	Biphasic	Single, Re-petitive, Burst	60	50
iTBS <sup>e</sup> Power Capability (%)	Maximum Discharge Energy <sup>f</sup> (J)	Treatment coil	Pulse Width <sup>a</sup>	Active Cooling	Rate of change <sup>a</sup>
80	258	5620-00-50 Horizon 3.0 E-z Cool Coil	350µs	Dual high-power cooling Fans	19.44 KT/s
MEP (EMG)	Navigation	Horizon Sham Adaptor Compatible	Patient Data Management	External Triggering	
✓	✓	✓	✓	✓	

<sup>a</sup> Typical Values.

<sup>e</sup> FDA Cleared iTBS 600 protocol. 5Hz/50Hz, 3 pulses, 10 bursts, 20 cycles, cycle time of 10s, total 600 Pulses.

<sup>f</sup> Maximum Discharge Energy is dependent on the system configuration and connected coil.

Building on the foundations of the Horizon 3.0, now with StimGuide Pro.

### **Navigation Overview**

The best there is to offer from a clinical navigation system, where repeatability and accuracy matter the most.

The use of StimGuide Pro is designed to enhance the accuracy of coil placement during TMS sessions. This reduces the risk of off-target stimulation and ensures that the magnetic pulses are delivered to the intended brain regions, optimizing the therapeutic effects.

This is particularly crucial in TMS, where the efficacy of the treatment often depends on accurate and targeted stimulation of neural circuits associated with the patient's condition.

Clinicians can have greater confidence that the delivered TMS pulses are reaching the intended targets, leading to more consistent and predictable therapeutic results.

### **System features:**

- Quality metrics to ensure all pulses are delivered

The software is designed to display the stimulator control, EMG and Navigation all within one application, condensing the system down to one touchscreen monitor.

### **Features include:**

- Visual approximation of all 10/20 electrode positions.
- Four points of anatomical registration for improved accuracy of the size of the patient's head
- Anatomical Landmark registration check.  
(Visibility of the pointer tool on screen after registering landmarks).
- Advanced on-screen visualization of the Pointer tool (full scale) and Coils (1/3 Scale).
- Gimbal navigation aid for rotation and tilt movements.
- Navigation by coordinate input.

New Tracking Camera with an increased viewing volume.

- Typical positional accuracy of the Navigation Camera:  $\leq \pm 0.2$  mm.
- Typical rotational accuracy of the Navigation Camera:  $\leq \pm 0.1^\circ$ .

All new Navigation Tracker Tools, featuring four points of reference each, allow for more accurate positioning of the coils.

Remote Pointer Tool allowing complete freedom for anatomical landmark registrations.

Fully integrated with Magstim Connect and Analytics, allowing the navigation data to be saved and recalled from any Horizon 3.0 StimGuide Pro within the installation's organization. See our section on Magstim Connect for more information.

## Horizon 3.0

Part No. 5795-00-50

Introducing Horizon 3.0, the cutting-edge TMS device designed to revolutionize clinical treatment for conditions such as Major Depressive Disorder and OCD. This device has also received prior clearance for Comorbid Anxiety under K223154 FDA.

Developed by Magstim, a pioneer with 30 years of expertise in TMS technology, Horizon 3.0 combines innovation, reliability, and efficiency to deliver optimal patient outcomes.

Product Name	Part No.	Pulse Type	Output Type	Maximum Frequency (Hz/ pps)	Max burst Frequency at Max Power (Hz)
Horizon 3.0	5795-00-50	Biphasic	Single, Re-petitive, Burst	60	50
iTBS <sup>e</sup> Power Capability (%)	Maximum Discharge Energy <sup>f</sup> (J)	Treatment coil	Pulse Width <sup>a</sup>	Active Cooling	Rate of change <sup>a</sup>
80	258	5620-00-50 Horizon 3.0 E-z Cool Coil	350µs	Dual high-power cooling Fans	19.44 KT/s
MEP (EMG)	Navigation	Horizon Sham Adaptor Compatible	Patient Data Management	External Triggering	
✓	-	✓	✓	✓	

<sup>a</sup> Typical Values.

<sup>e</sup> FDA Cleared iTBS 600 protocol. 5Hz/50Hz, 3 pulses, 10 bursts, 20 cycles, cycle time of 10s, total 600 Pulses.

<sup>f</sup> Maximum Discharge Energy is dependent on the system configuration and connected coil.

<sup>l</sup> 23°C recommended ambient room temperature.

### **Horizon 3.0 E-z Cool Coil**

High-performance air-cooled treatment coil designed for back-to-back treatments in environments up to 30°C ambient temperature.

### **Horizon 3.0 Stimulator**

Leveraging Magstim's three decades of TMS knowledge, the Horizon Stimulator is a renowned and established device known for its reliability and effectiveness. Now with a user interface software workflow designed specifically for clinical TMS, a full HD 21.5" display, and integrated EMG measurement device.

### **Magstim Connect & Analytics.**

Cloud-connected Patient Data Management System designed to facilitate seamless connectivity across multiple sites. See our section on Magstim Connect and Magstim Analytics for more information.

### **Motor Threshold Coil**

Handheld coil with remote stimulator control functionality, providing clinicians with enhanced flexibility while undertaking MT assessments.

### **Treatment Chair**

Electronically actuated devices are designed to allow movement for optimal patient comfort and stability during treatment.

A specially designed headrest minimizes patient movement without compromising patient comfort, ensuring the head remains securely in place for precise TMS application.

The **Horizon 3.0 Cart** features a coil holder and weightless counterbalance, allowing smooth movement and easy positioning of the coil during treatments.

### **Benefits for Clinicians**

- State-of-the-art technology backed by Magstim's legacy of innovation.
- Streamlined treatment with an optimized software workflow.
- Enhanced patient data management and connectivity through Magstim Connect.

### **Benefits for Patients**

- Comfortable and stable treatment experience with the electronically actuated Treatment Chair.
- Precise and personalized treatment plans based on Motor Threshold assessment.
- Cutting-edge technology for improved treatment outcomes and overall well-being.
- A more comfortable pulse width. Shorter pulse widths can cause increased discomfort.

In conclusion, Horizon 3.0 represents the next frontier in TMS technology, offering a comprehensive solution for clinicians seeking advanced, reliable, and patient-centric treatment options. Elevate your practice with Horizon 3.0, where innovation meets experience for optimal clinical outcomes.

For 115V installations, contact Magstim.

Also available without the treatment chair.

# Horizon Inspire

Part No. 6250-00

Product Name	Part No.	Pulse Type	Output Type	Maximum Frequency (Hz/ pps)	Max burst Frequency at Max Power (Hz)
Horizon Inspire	6250-00	Biphasic	Single, Repetitive, Burst	60	50
iTBS <sup>®</sup> Power Capability (%)	Maximum Discharge Energy <sup>f</sup> (J)	Treatment coil	Pulse Width <sup>a</sup>	Active Cooling	Rate of change <sup>a</sup>
80	258	4980-00 Horizon Air Film Coil	300µs (Nominal)	Single cooling Fan	25 KT/s
MEP (EMG)	Navigation	Horizon Sham Adaptor Compatible	Patient Data Management	External Triggering	
1 Channel	-	✓	✓	✓	

<sup>a</sup> Typical Values.

<sup>e</sup> FDA Approved iTBS 600 protocol. 5Hz/50Hz, 3 pulses, 10 bursts, 20 cycles, cycle time of 10s, total 600 Pulses.

<sup>f</sup> Maximum Discharge Energy is dependent on the system configuration and connected coil.

The Horizon Inspire is a user-friendly, cost-effective TMS system with no pay-per-use plans. Its compact design allows for easy maneuverability between clinic rooms, making it a convenient choice for busy practices.

Horizon Inspire Benefits:

- Cost effective & user friendly
- No pay-per-use plans
- Perfect for first time TMS users or experienced TMS users
- Intuitive preset clinical workflow
- High-powered air-cooled technology, for back-to-back treatments
- Compact design for portability
- Powerful data analytics

This package features the Horizon Inspire Stimulator, Horizon MT remote coil, Horizon Air Film Coil, and a lightweight, small footprint cart.

- Enhanced Burst Capability
- Highly Durable Coil Connector
- Optimized MT coil for Motor Threshold Mapping
- Patient Data Management
- MEP (EMG) Functionality
- External Triggering

Available with or without the Treatment Chair.

# Horizon Lite

Part No. 5410-00

Product Name	Part No.	Pulse Type	Output Type	Maximum Frequency (Hz/ pps)	Max burst Frequency at Max Power (Hz)
Horizon Lite	5410-00	Biphasic	Single, Repetitive, Burst	60	50
iTBS <sup>e</sup> Power Capability (%)	Maximum Discharge Energy <sup>f</sup> (J)	Treatment coil	Pulse Width <sup>a</sup>	Active Cooling	Rate of change <sup>a</sup>
67	258	4980-00 Horizon Air Film Coil	300µs	Single cooling Fan	25 KT/s
MEP (EMG)	Navigation	Horizon Sham Adaptor Compatible	Patient Data Management	External Triggering	
-	-	✓	-	-	

<sup>a</sup> Typical Values.

<sup>e</sup> FDA Approved iTBS 600 protocol. 5Hz/50Hz, 3 pulses, 10 bursts, 20 cycles, cycle time of 10s, total 600 Pulses.

<sup>f</sup> Maximum Discharge Energy is dependent on the system configuration and connected coil.

The Horizon Lite is a cost-effective option with a compact footprint, which is beneficial for smaller and startup clinics.

This package features the Horizon Stimulator, Horizon MT remote coil, Horizon Air Film Coil, and a lightweight, small footprint cart.

The Horizon System is derived from the highly successful Rapid<sup>2</sup> System, with optimizations designed for the clinical environment.

- Enhanced Burst Capability
- Highly Durable Coil Connector
- Optimized MT coil for Motor Threshold Mapping.

Optimized for comfort, the bespoke treatment chair ensures patient comfort and provides reassurance that the treatment is administered on target as intended (see the Compatible Accessories & Consumables section for more details).

Available Without the Treatment Chair – Part No. 5415-00

For 115V installations, contact Magstim Customer Service.

# STIMULATOR UPGRADE PACKAGES

See the Accessories & Consumables section for more details on listed items.

**NAVIGATION  
INTRO.**

---

Pioneers in integrated TMS Navigation, Magstim has developed Horizon 3.0 with StimGuide Pro for neuronavigation where repeatability and accuracy matter the most.

The use of StimGuide Pro is designed to enhance the accuracy of coil placement during TMS treatment sessions. This reduces the risk of off-target stimulation and ensures that the magnetic pulses are delivered to the intended brain regions, optimizing the therapeutic effects.

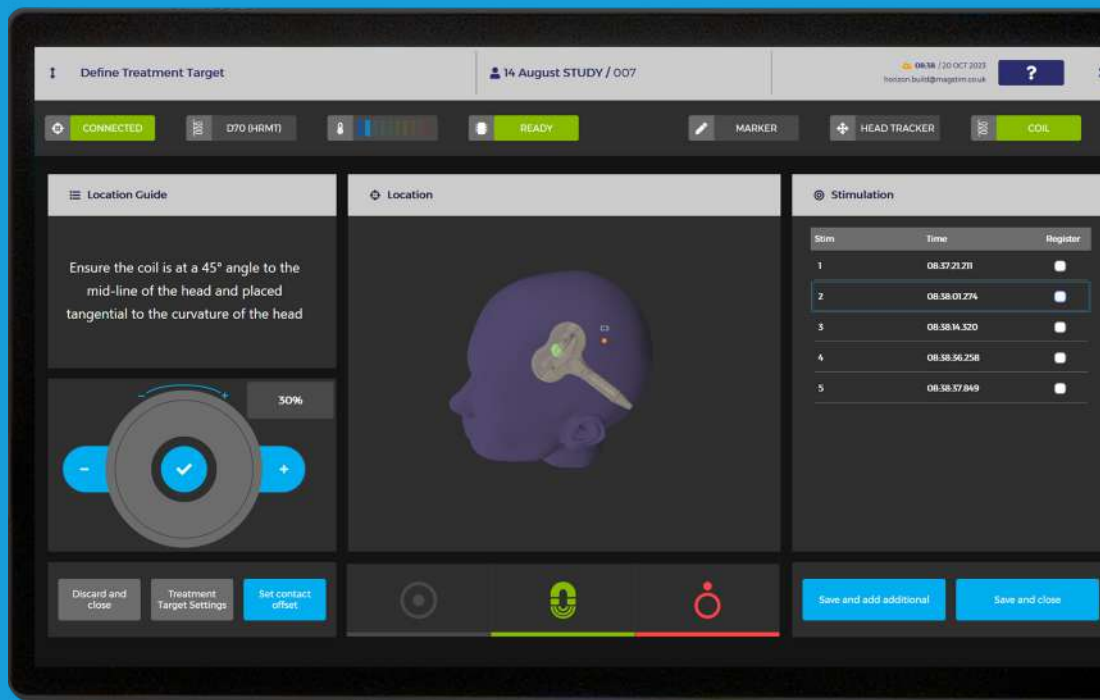

This is particularly crucial in TMS, where the efficacy of the treatment often depends on accurate and targeted stimulation of neural circuits associated with the patient's condition.

Ultimately, the precision and repeatability afforded by TMS Navigation technology could contribute to improved treatment outcomes. Clinicians can have greater confidence that the delivered TMS pulses are reaching the intended targets, leading to more consistent and predictable therapeutic results.

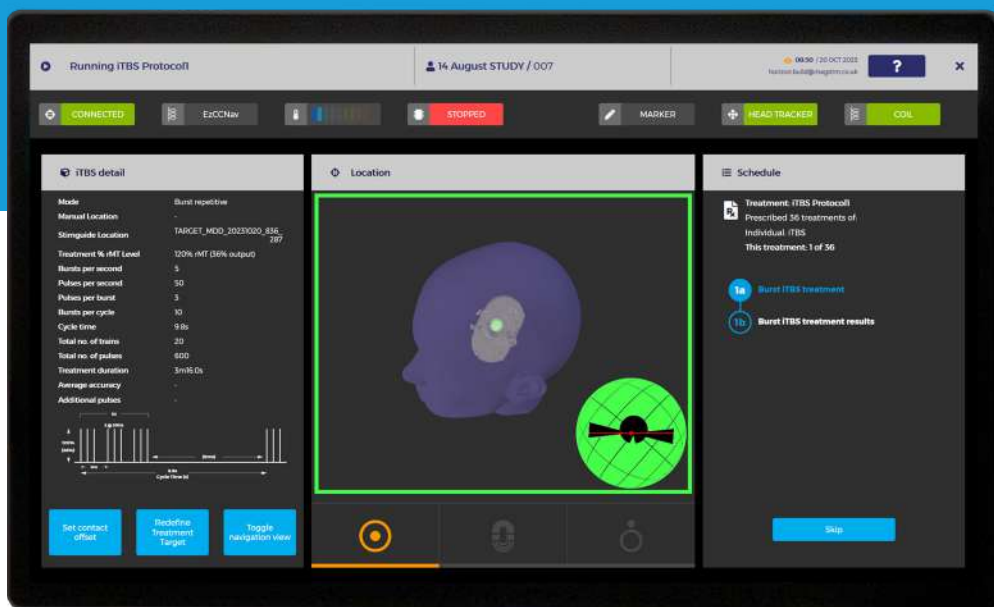

**HORIZON 3.0  
STIM GUIDE PRO  
NAVIGATION.**

## Designed to improve coil positioning, where repeatability and accuracy matter the most.

- New camera for improved accuracy.
- Improved navigation workflow.
- Reduces the risk of off-target stimulation for consistent results.
- New bluetooth anatomical pointer tool for improved user experience.

# **MAGSTIM CONNECT.**

Magstim Connect is designed to enable multiple compatible TMS therapy systems to be managed from one central system. This allows treatment templates, patient records, and treatment history to be securely shared between treaters and treatment sites. Magstim Connect will also send depression scoring questionnaires to patients and provide a score for the patient to the clinician based on existing clinical rating scales. The system is designed to accommodate multiple networked sites where patients may be treated at more than one clinical site.

- Patient data is synchronized across your Horizon 3.0 systems and web application.
- Create treatment plan templates from your workstation.
- Manage patients and assign treatment plans.
- Issue clinical self-assessment questionnaires.
- Assign treatment scores to patients post treatment E.g., Y-BOCS, PHQ-9, GAD-7 etc.
- Track and manage:
  - Clinics within the organization
  - Patient details
  - User/Treaters
  - Management of Referring physicians
  - Insurance providers
  - Clinical assessment history
  - Treatment history
  - Medical diagnosis
  - Diagnosis notes
  - Medication notes
  - Download Treatment Progress report form in pdf format

† Horizon 3.0 systems

# **MAGSTIM ANALYTICS.**

Magstim Analytics collects metric data across patients, clinicians delivering therapy, specific clinics, and TMS devices. The software is not intended for diagnosis of any conditions or to make clinical judgements. It is for organization of data.

Magstim Analytics is designed to streamline the management of multiple systems in an installations organization. With a web access portal, Magstim Analytics is accessible on multiple devices, including laptops, PC's, and mobile devices.

## Features include:

### Patient, Treater, and Clinic Analytics.

- o Motor threshold (MT) levels
  - Configurable based averages including patients by demographic
  - Visualization of analytics
- o Clinical assessment progress
  - Configurable averages
  - Visualization of progress
  - Improvement percentages over a treatment plan
  - Normalization of various scoring scale progression
  - Not intended for diagnosis of any condition
- o Treatment accuracy
  - Configurable averages.
  - Visualization of accuracy
  - Comparison of accuracy against averages
- o Protocol history
  - See full parameter sets used for protocol delivery
  - See any notes made during treatment
  - See any changes made to power or positioning made during treatment

### Device Analytics

- o MT Levels
- o Treatment accuracy
- o Protocol History
- o Event Log & Audit trail
  - Highlights any events of changes made on the device e.g., settings and network activity etc.
  - Software versions and update history
- o Device lifetime management
  - EPV levels
  - HCI Levels
  - Service Dates
  - Highlight Devices which are close to or over limit.
  - Sends automated E-mails to the Device Administrator to highlight service indicators.

**COIL  
INTRO.**

---

Magstim has a large portfolio of TMS coils that come in various sizes and configurations, catering to different research and clinical needs, enabling professionals to explore a wide range of applications, from studying brain function to treating clinical disorders.

**What makes Magstim coils so unique:**

Magstim coils are known for precision and reliability in delivering targeted stimulation to specific regions of the brain. Magstim coils are renowned for their design, versatility and adaptability.

Some Magstim coils have been ergonomically designed with handheld controls to allow for ease use when treating patients.

**Coil Configuration**

Over the past 30 years, Magstim continues to expand its coil portfolio with the following TMS coil configurations:

- Figure of 8 Coils
- Circular Coils
- Double-Coned Coils
- Sham (Placebo) Coils
- Coated Coils (Flat & Branding Iron)

# Magstim

## Single 90mm Coils

### Single 90mm Standard Coil

Part No. 3193-00

- Large circular magnetic field
- Simple current reversal by using alternative coil side

**Ideal for:**

Stimulating large areas, such as spinal roots

**Users in the USA:** The Magstim 90mm Coil is FDA 510(k) cleared for the stimulation of peripheral nerves. All other uses are considered investigational. In accordance with US federal regulations an IDE and/or IRB approval may be required.

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓

### Single 90mm Remote Control Coil

Part No. 3192-00

- Large circular magnetic field
- Simple current reversal by using alternative coil side
- Control the stimulator output directly from the coil

**Ideal for:**

Stimulating large areas and motor conduction assesments

**\*Pulse triggering only with the Rapid<sup>2</sup> - Contact us for more information**

**Users in the USA:** The Magstim 90mm Coil is FDA 510(k) cleared for the stimulation of peripheral nerves. All other uses are considered investigational. In accordance with US federal regulations an IDE and/or IRB approval may be required.

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓*

# Magstim Alpha Coils

## Alpha (α) Flat Coil Range (Coated)

Part No.

D40 α - 4180-00 | D50 α - 4186-00 | D60 α - 4190-00 | D70 α - 4170-00

- Focal magnetic field between double coil windings
- Reduced coil size reduces spread and depth of magnetic field

**Ideal for:**

Different focalities and depths of stimulation

**Users in the USA:** CAUTION: Investigational device. Limited by Federal (or United States) Low to investigational use. In accordance with US federal regulations an IDE and/or IRB approval may be required

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓

## Alpha (α) B.I. Coil Range (Coated)

Part No.

D25 B.I. - 5220-00 (Rapid<sup>2</sup> only) | D40 B.I. - 4179-00 | D50 B.I. - 4185-00  
D60 B.I. - 4189-00 | D70 B.I. - 4510-00

- Focal magnetic field between double coil windings
- Reduced coil size reduces spread and depth of magnetic field
- Practical branding iron design for confined stimulation applications

**Ideal for:**

Different focalities and depths of stimulation, and for close proximity dual-site stimulation

**Users in the USA:** CAUTION: Investigational device. Limited by Federal (or United States) Low to investigational use. In accordance with US federal regulations an IDE and/or IRB approval may be required

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓

# Magstim

## Double 70mm Coils

### D70 Alpha (α) Coil

Part No. 4150-00

- Focal magnetic field between double coil windings
- High use in published research
- **SHAM coil available (4334-00)** - SHAM only compatible with Rapid<sup>2</sup> and the Super Rapid<sup>2</sup>

**Ideal for:**

Blinded, sham-controlled studies

**Users in the USA:** CAUTION: Investigational device. Limited by Federal (or United States) Low to investigational use. In accordance with US federal regulations an IDE and/or IRB approval may be required

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓

### D70mm Remote Control Coil

Part No. 3190-00

- Focal magnetic field between double coil windings
- Control the stimulator output directly from the coil

**Ideal for:**

Focal stimulation and motor threshold assessment on the 200<sup>2</sup> and BiStim<sup>2</sup> stimulators

**\*Pulse triggering only with the Rapid<sup>2</sup> - Contact us for more information**

**Users in the USA:** Magstim D70 Remote Coil is FDA 510(k) cleared for the stimulation of peripheral nerves. All other uses are considered investigational. In accordance with US federal regulations and IDE and/or IRB approval may be required.

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓*

## D70 MT Remote Coil

Part No. 4949-00

- Focal magnetic field between double coil windings
- Control the stimulator output directly from the coil

**Ideal for:**

Motor threshold testing

**\*Single shot discharge only - Contact us for more information**

**Users in the USA:** Magstim D70 Remote Coil is FDA 510(k) cleared for the stimulation of peripheral nerves. All other uses are considered investigational. In accordance with US federal regulations and IDE and/or IRB approval may be required.

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓

## D70<sup>2</sup> Coil

Part No. 4102-00

- Highly focal magnetic field
- Overlapped coil windings provide increased stimulation efficiency
- Reach motor threshold upto 25% less stimulator output
- Ergonomic Coil handle for increased user comfort

**Ideal for:**

Subjects with high motor thresholds

**Users in the USA:** Magstim D70 Remote Coil is FDA 510(k) cleared for the stimulation of peripheral nerves. All other uses are considered investigational. In accordance with US federal regulations and IDE and/or IRB approval may be required.

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓

# MAGSTIM DOUBLE CONED COIL

## 110mm Double Cone Coil

Part No. 4610-00

- Provides deep magnetic stimulation
- 70% higher induced current in the central fissure<sup>+</sup>
- Widely used in published research for a range of deep stimulation applications

### Ideal for:

Stimulating deep targets, such as the lower limb motor cortex regions

### + Compared to a 90mm circular coil

**Users in the USA:** CAUTION: Investigational device. Limited by Federal (or United States) Low to investigational use. In accordance with US federal regulations an IDE and/or IRB approval may be required

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
✓	✓	✓

# MAGSTIM COOLING ASSISTED COILS

## D70mm Air Film Coil (AFC)

Part No. 3910-00

- Focal magnetic field between double coil windings
- Powerful air cooling
- **SHAM** coil available (3950-00)
- Packages available

### Ideal for:

Demanding protocols (e.g., theta burst stimulation) and blinded, sham-controlled studies

CAUTION: Users in the USA, the Magstim D70 Air Film Coil (AFC) is a stimulating coil intended for use with the Magstim Rapid<sup>2</sup> Stimulating Unit for the purpose of peripheral nerve stimulation and treatment of Major Depressive Disorder (MDD).

All other uses including the use of the D70 Air Film Coil (AFC) with the Super Rapid<sup>2</sup> Plus<sup>1</sup> are considered investigational. In accordance with US federal regulations an IDE and/or IRB approval may be required.

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
		✓

## D70mm Air Film Coil & Cart Package

Part No. 5570-00

### Package includes:

3910-00	Double 700mm Air Film Coil (AFC)
5290-00	Stimulator Cart
5392-00	Cart Mounted Arm

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>
		✓

## Air Film Coil (AFC) Package with SHAM

Part No. 5565-00

### Package includes:

3950-00	D70mm Air Film Sham Coil
3910-00	Double 70mm Air Film Coil (AFC)
5290-00	Stimulator Cart
5392-00	Cart Mounted Arm

Compatibility		
200 <sup>2</sup>	BiStim <sup>2</sup>	Rapid <sup>2</sup>

## Horizon AFC

Part No. 4980-00

This coil has a single air-cooling fan which provides impressive cooling abilities. The user can expect minimal cooling periods in between patients with this coil. With an impressive rate of change, the renowned D70mm Air Film coil is elevated to the Clinical environment with a durable coil connector. This coil has a huge diversity of applications, inducing an electric field of 130V/m (1.0 SMT k) at a depth of up to 4CM a at maximum machine output.

- Focal Magnetic field between double 70mm coil windings
- Compatible with the 6606-00 Horizon Adaptor (Sham).
- Intended to mount directly to the 5420-00 Stimulator Cart with Cart Mounted Coil Arm.

## E-z Cool Coil

Part No. 4999-00 | 5367-00

With on-board fan speed control, the E-z Cool Coil optimises its performance to the demands of its environment, minimising noise and ensuring uninterrupted treatments. The user can expect to treat patients back-to-back in ambient temperatures of up to 30°C.

This coil has approvals for the treatment of Major depressive disorder (MDD), obsessive compulsive disorder (OCD), and Comorbid anxiety, with more being added in line with efficacy-based evidence and regulatory approvals. Inducing an electric field of 130V/m (1.0 SMT) at a depth of up to 3 cm.

- Focal Magnetic field between double 70mm coil windings.
- Compatible with the 6606-00 Horizon Adaptor (Sham).
- Intended to mount directly to the system cart.

## Horizon 3.0 E-z Cool Coil (Nav)

Part No. 5620-00

With on-board fan speed control, the E-z Cool Coil optimises its performance to the demands of its environment, minimising noise and ensuring uninterrupted treatments. The user can expect to treat patients back-to-back in ambient temperatures of up to 30°C.

This coil has approvals for the treatment of Major depressive disorder (MDD), obsessive compulsive disorder (OCD), and Comorbid anxiety, with more being added in line with efficacy-based evidence and regulatory approvals. Inducing an electric field of 130V/m (1.0 SMT) at a depth of up to 3 cm.

- Supplied with IR Tracking Spheres and Posts for Navigation.
- Focal Magnetic field between double 70mm coil windings.
- Compatible with the 6606-00 Horizon Adaptor (Sham).
- Intended to mount directly to the system cart.

## MT Coil

Part No. 4990-00

The Horizon MT Coil is the perfect tool to enable the user freedom of movement while undertaking a motor threshold assessment.

On coil controls featuring a system intensity display and controls for adjusting the stimulator output, applying a pulse, and disarming the system, the user can give the patient their full attention during a motor threshold assessment with no need to return to the system to make adjustments.

Physical buttons for adjusting the stimulator intensity mitigate the risk of accidental power increase which may be present in rotary wheel methods of adjustment.

- Handheld with ergonomic on coil controls.
- Non-cooled design intended for motor threshold assessments.

## Horizon Adaptor Package (Sham)

Part No. 6606-00

### Package includes the following:

6601-00 Horizon Adaptor (Standard)

6602-00 Horizon Adaptor (Sham)

Includes two adaptors, Standard and Sham, for use with compatible coils and system, enabling the use of a single coil for both standard (conventional or active) and sham stimulation.

### Sham adaptor

The use of the sham adaptor alters the connected coils output to apply sham stimulation.

- No on-target stimulation
- No audible difference between standard and sham stimulation
- Provides similar tactile sensation.

### Standard adaptor

The use of the standard adaptor does not alter the stimulation output of the connected coil. The adaptors are visually identical to one another except for the part number located on the product label.

- Enables double blind study.

**Users in the USA:** CAUTION: Investigational device. Limited by Federal (or United States) Law to investigational use. In accordance with US federal regulations an IDE and/or IRB approval may be required.

**TMS  
ACCESSORIES.**

---

Included in the Magstim product portfolio are accessories and consumables for TMS. Accessories and consumables are designed to be used only on Magstim TMS devices, products include:

- Navigation tracking tools  
(spheres, remote pointer tools, tracking tools)
- Patient caps – available in various sizes
- Electrodes for MEP
- EMG measurements leads
